SMTP - Simple Mail Transfer Protocol

Code:

```
import smtplib

# list of email_id to send the mail

li = [ "receiver_email1@gmail.com", "receiver_email2@gmail.com"]

for dest in li:

    s = smtplib.SMTP('smtp.gmail.com', 587)

    s.starttls()

    s.login("sender_email@gmail.com", "App password ")

    message = "hello my dear friends"

    s.sendmail("thakurvidhatri45368@gmail.com", dest, message)

    s.quit()
```

To create App password:

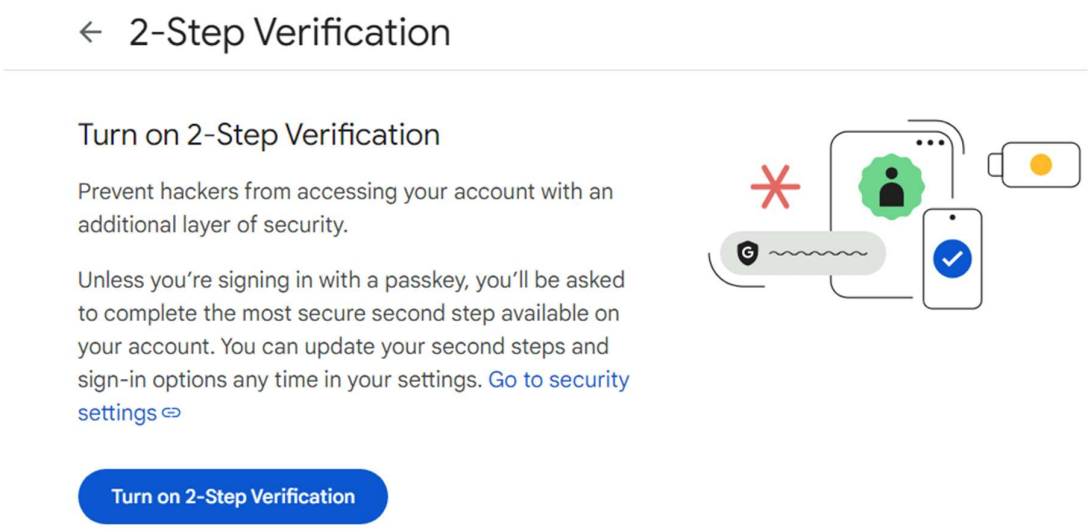

1. On the 2-step verification of sender gmail account
2. Go to Manage Google account

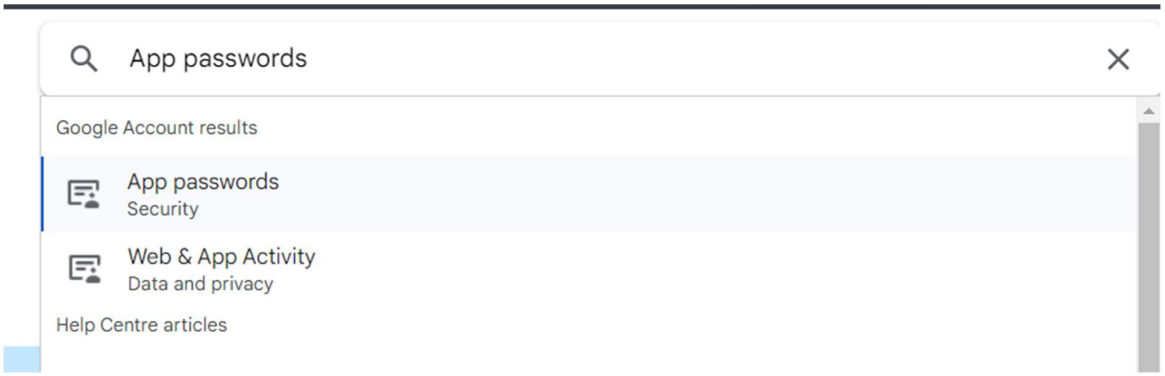

3. Go to security

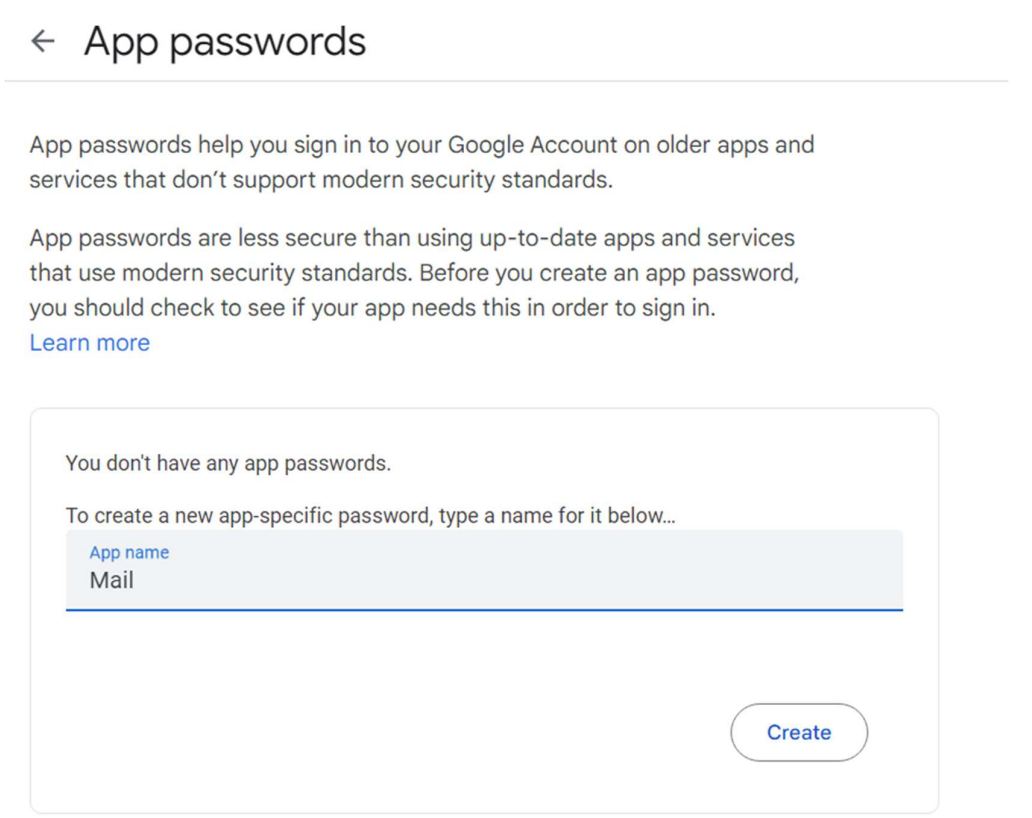

4. Click on 2-step verification

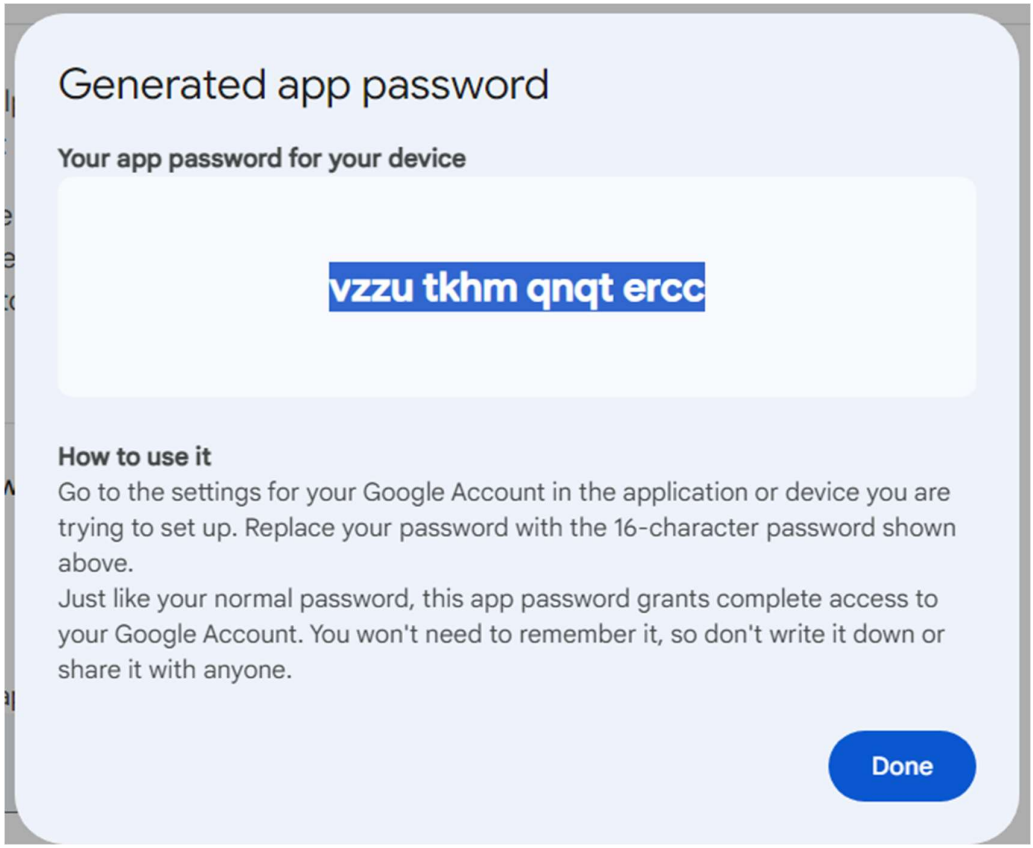

5. Turn on 2-step verification

6. Search App passwords in search bar

7. Create App password

8.Copy the App password and paste it in the code.
